

SOAPjs News

## **0.4 Release**

No library updates, just added some documentation and simple calculator example.

## **0.3 Release**

Minor update, added a demonstration proxy server to consume SOAP resources anywhere. Added get/set Proxy functions to configure the address of the SOAP server. Additionally I have started work on a simple calculator application as a more complete demonstration / use case.

## **0.2 Updated Release**

Fixed and packaged SOAPjs a bit better. I now have a working demonstration of SOAPjs. Additionally, I fixed a bug that gSOAP ignores but PHP's SOAP server flips out over.

## **0.1 Initial Release**

This is the first release of SOAPjs, Undoubtedly there are things incorrectly documented or unfortunately tagged. Please email [Richard June](mailto:Richard_June) with any problems.
