

# Config-dhcpd

Config-dhcpd is a GUI configuration tool for DHCPd. Initially created to fill a gap in [Fedora's](#) system-config-\* tools. [Config-dhcpd 0.8](#) is the latest release, please grab it from sourceforge.

## Config-dhcpd news

- [0.10](#) - 0.10 is up, I've just added max and default lease times, as well as the ability to set a timeserver.
- [Record downloads](#) - This month saw a record 339 downloads and it broke a daily rank of 1000 on sourceforge. It r  
born. Thanks everyone, I do hope config-dhcpd makes your life easier. Remember, if you need any help, please go  
can.
- [0.8-2 bugfix](#) - There was a bug in 0.8 causing it to simply not start. I had tried to import a library no longer distribu
- [0.8 release](#) - 0.8 is out, there are a couple of caveats about this one though. It does add the beginning of sanity check

It will ignore your existing configuration. I'm sorry about this, but moving to JSON broke th  
I had a brainfart when doing the 0.7 package, I created symlinks in %post and %postun scripts

- [0.8 update](#) - I have added group functionality to 0.8, I need to work on sanity checking still before it's ready. The n  
about that, but the configObject backend was too much of a pain to make work with the new object model. The ne  
dhcpd config parser. --Rjune 01:14, 13 October 2009 (UTC)
